Background & Context

- The Nigerian economy emerged from recession in Q2 2017, and the macroeconomic environment has stabilized and is recovering gradually.
- This has renewed confidence in the country's growth prospects.
- The Economic Recovery and Growth Plan (ERGP), which underpins government's economic recovery actions, is the basis for medium term fiscal strategy to achieve sustained economic growth, diversification and social inclusion.
- Some of the underlying assumptions and targets in the ERGP have been updated to reflect current realities/projections.

Summary of 2018 Budget Performance

Summary of 2018 Budget Performance .../2

- ❑ As at the end of the third quarter, Federal Government's actual aggregate revenue was **N2.84 trillion**, which is **40 percent higher** than **2017 revenue**. This includes:
 - Oil Revenue of **N1.51 trillion** (101 percent higher than 2017);
 - Company Income Tax (CIT) of **N500.37 billion** (23 percent higher than 2017);
 - Value-Added Tax (VAT) of **N100.37 billion** (5 percent higher than 2017); and
 - Customs Collections of **N229.62 billion** (11 percent higher than 2017).
- ❑ The overall revenue **performance is only 53 percent** of the target in the 2018 Budget largely because some one-off items such as the **N710 billion** from Oil Joint Venture **Asset restructuring** are yet to be actualized and have been rolled over to 2019.

Summary of 2018 Budget Performance .../3

- ❑ Of the total appropriation of **N9.12 trillion**, **N4.59 trillion** had been spent by 30th September, 2018 against the prorated expenditure target **of N6.84 trillion**. This represents **67% performance**.
- ❑ Debt service and the implementation of non-debt recurrent expenditure, notably payment of workers' salaries and pensions are on track.

2018 Capital Expenditures

- Capital releases only commenced after the signing of the 2018 Budget on 20th June, 2018. As at 14th December 2018, a total of **N820.57 billion** had been released for capital projects.
- Spending on capital has been prioritised in favour of critical ongoing infrastructural projects in the power, roads, rail and agriculture sectors.
- Implementation of the 2018 Capital Budget will continue into 2019 until the 2019 Budget is passed into law.

Key Initiatives to improve FGN Revenues

- The Federal Government has also sustained its efforts to improve public financial management through the comprehensive implementation of the:
 - ✓ Treasury Single Account (**TSA**),
 - ✓ the Government Integrated Financial Management Information System (**GIFMIS**) and
 - ✓ the Integrated Payroll and Personnel Information System (**IPPIS**).
- President has directed that immediate action be commenced to restructure the Joint Venture Oil Assets so as to reduce government shareholding to 40 percent and that this exercise must be completed within the 2019 fiscal year.
- The Department of Petroleum Resource shall, within three months, complete the collection of past-due oil license and royalty charges.

Key Initiatives to improve FGN Revenues .../2

- Following Mr. President's directive:
 - ✓ The Ministry of Finance, working with all the relevant authorities, has been authorized to take action to liquidate all recovered, unencumbered assets; within 6 months.
 - ✓ Given the improved oil prices and production levels, Nigerian National Petroleum Corporation (NNPC) is to immediately commence the recovery of all outstanding obligations, including those due from Nigerian Petroleum Development Company (NPDC) (a subsidiary of NNPC), which it had agreed to pay since 2017.
- Finally, amongst other revenue generating initiatives, Mr. President has directed that work should be immediately concluded on the deployment of the **National Trade Window** and other technologies to enhance Customs collections efficiency from the current 64 percent to up to 90 percent over the next few years.

GLOBAL OUTLOOK: **RECENT DEVELOPMENTS AND PROSPECTS**

Background to the 2019 Budget:

Global Environment

Global economic recovery is projected to **remain steady** at its 2017 level of **3.7%** in 2018 and 2019.

Sub-Saharan Africa is projected to continue to **grow rising** from 2.7% in 2017 to **3.1% and 3.8%** in **2018 and 2019** respectively.

Background to the 2019 Budget:

Global Environment .../2

- The steady rate of global economic recovery is based on the expectations of investment rebound resulting from; strengthening commodity prices, and rising aggregate demand.
- However, the forecast also reflects the negative effects of rising trade barriers, tightening of monetary policy, reversal of capital flows to emerging market economies, geopolitical tensions, and higher oil import bills.
- Growth in advanced economies is expected to decline from 2.4% in 2018 to 2.1% in 2019.

Background to the 2019 Budget:

Global Environment .../3

- In the Euro area, growth is projected to slow-down from 2.4% in 2017 to 2.0% in 2018 and 1.9% in 2019.
- Emerging Market and Developing Economies (EMDEs) in Asia are expected to maintain their robust performance, growing at 4.7% in 2018 and 2019.

Global Economic Growth (%)			
		Projections	
	2017	2018	2019
World Output	3.7	3.7	3.7
Advanced Economies	2.3	2.4	2.1
United States	2.2	2.9	2.5
Euro Area	2.4	2.0	1.9
Emerging Market & Developing Economies	4.7	4.7	4.7
China	6.9	6.6	6.3
India	6.7	7.3	7.4
Brazil	1.0	1.4	2.4
Sub- Saharan Africa	2.7	3.1	3.8
South Africa	1.3	0.8	1.4

- In the United States, near-term momentum in the economy is expected to strengthen temporarily, with growth projected to rise from 2.2% in 2017, to 2.9% in 2018. In 2019, growth is projected to slow down to 2.5%.

Background to the 2019 Budget:

Global Environment .../4

- US withdrawal from Trans Pacific Partnership (TPP), its all-out trade war with China and ongoing renegotiation of other trade agreements are threats to the fragile global growth recovery.

The Nigerian Economy: Implications of Global & Domestic Developments

Background to the 2019 Budget:

Domestic Environment

- Macroeconomic stability has been largely achieved. Growth is expected to increase from 0.8% in 2017 to 2.1% in 2018 and 3.01% in 2019 with the continuing implementation of the ERGP.
- Employment growth usually slows down during recession and takes some time to recover. It is not therefore surprising that the National Bureau of Statistics (NBS) data shows that unemployment and underemployment remain high in Nigeria.
- However, it must be emphasized what the NBS' report shows is not that jobs have been lost. It actually shows that there has been a significant net job creation, but that the level of growth in new jobs is less than the number of new entrants into the job market; hence a net increase in unemployment rate.
- We expect more diversified and inclusive growth over the medium-term, and reduction in the rate of unemployment, as we continue to implement the policies and programmes of the ERGP.

Background to the 2019 Budget:

Domestic Environment .../2

- Considerable success has been recorded in containing the insurgency in parts of the North-East, with economic activities recovering.
- Recurring conflicts between farmers and herdsmen in some parts of the country as well as incidence of flooding have affected agricultural production.
- As a result, while the agriculture sector grew in real terms by 3.0% in Q1 2018, it only grew by 1.19% in Q2 2018, and 1.91% in Q3 2018.
- Militancy in the Niger Delta has generally abated, although breaches of pipelines still regularly occur. This was partly responsible for the production level dropping to 1.84mbpd in the 2nd quarter from 2mbpd in the first quarter (average of 1.95 mbpd by end Q3)

Background to the 2019 Budget:

Domestic Environment .../3

- Inflation is beginning to inch up, after 18 consecutive months of decline, in Aug 11.23% and Sept. 11.28%, October – 11.26% and November 11.28%, as the base effect has begun to wear off.

Underlying Assumptions driving the Macroeconomic Parameters & Targets for the **2019 BUDGET**

Key Assumptions & Macro-Framework of 2019 Budget .../2

Key Assumptions & Macro-Framework of 2019 Budget .../3

- Notwithstanding the recent softening in international oil prices, the considered view of most reputable oil industry analysts is that the downward trend in recent months is not necessarily reflective of the outlook for 2019.
- However, we will closely monitor the situation and will respond to any changes in the international oil price outlook for 2019.
- Mr. President has directed the NNPC to take all possible measures to achieve the targeted oil production of 2.3 million barrels per day.

Approach to the 2019 Budget

- The 2019 Budget proposal seeks to continue the reflationary & consolidation policies of the 2017 and 2018 Budgets respectively, which helped put the economy back on the path of growth
 - On the expenditure side, allocations to Ministries, Departments and Agencies (MDAs) of Government were guided by the 3 core objectives of the ERGP, which are, (i) Restoring and Sustaining Growth; (ii) Investing in our People and (iii) Building a Globally Competitive Economy.
 - As with 2016, 2017 and 2018 Budgets, the 2019 Budget has been prepared on the Zero Based Budget (ZBB) Principles.
-
- ERGP, MTEF/FSP,
MTSS and MTFF*

 - The 2019-2021 Medium Term Fiscal Framework (MTFF), Medium Term Sector Strategies and proposed 2019 Budget reflect many of the reforms and initiatives in the ERGP, which is our roadmap to economic recovery and a more sustainable growth.
 - Projects are linked to government policies and overarching strategic priorities.

Recurrent Expenditure (N billions)

Recurrent Expenditure N'bn

- Note: Personnel costs including Overhead & pensions account for about 72% of recurrent non-debt expenditure.

Minimum Wage

- ❑ Government committed to an increase in the Minimum Wage
- ❑ Provision has been made for this in the 2019 Budget
- ❑ A High-powered Technical Committee has been set up to advise on ways to:
 - ensure that the attendant wage adjustments for those already over the Minimum Wage can be funded without increasing the level of borrowing
 - implement these consequential adjustments in such a manner as to minimize their inflationary impact
- ❑ The recommendations of the committee will be captured in the Finance Bill to be presented to the National Assembly together with the Minimum Wage Bill

Top 12 MDA Capital Expenditure Allocations in the 2019 Budget

Capital Expenditure (N billions)

MDA Capital Expenditure Allocations in the 2019 Budget

Capital Expenditure

- ❑ We have allocated N2.28 trillion for capital spending, inclusive of capital in statutory transfers.
- ❑ For comprehensiveness and transparency, the expenditure plans of the top 9 GOEs, as well as Multi-lateral and Bi-lateral project-tied loans have been integrated into the 2019 - 2021 Medium Term Fiscal Framework.
- ❑ With the inclusion of N275.88 billion representing capital for the top-nine GOEs and N556.02 billion for Multi-lateral/Bi-lateral project-tied loans, the aggregate capital budget is N3.12 trillion. This represents 30 percent of the total FGN proposed expenditure for 2019.
- ❑ In order to get full value for monies expended by the Government over time and to avoid duplication and waste, our emphasis will continue to be on completion of existing projects. Accordingly, provisions have been made to carry over projects that are not likely to be fully funded under the 2018 budget to the 2019 capital budget.

Conclusion

Conclusion

- The 2019 Budget of Continuity is intended to further reposition the economy on the path of higher, inclusive, diversified and sustainable growth, and to continue to lift significant numbers of our citizens out of poverty.
- The Budget also reflects the key execution priorities of the ERGP, namely Restoring Macroeconomic Stability; Agriculture and Food Security; Energy Sufficiency (in Power and Petroleum Products); Transportation Infrastructure; and Industrialization (focusing on SMEs).
- Government will continue to create the enabling environment for private sector to increase their investment and contribute significantly to job creation and economic growth.

Conclusion .../2

- Already, diversification efforts are yielding positive results with significant growth in the non-oil sector (2.32% growth in Q3 2018, up from 2.05% in Q2 2018).
- Nigeria faces significant challenges with respect to revenue generation and this is being tackled vigorously. Key reforms will be implemented with increased vigour to improve revenue collection and expenditure management.
- Our aim is to take all measure necessary to ensure that we grow rapidly while maintaining fiscal sustainability
